MAHADEVAN S

Junior Data Scientist

Chennai, Tamil Nadu | +91-7708820919 | mahadevan2134@gmail.com

LinkedIn | GitHub | Portfolio

Professional Summary

Junior Data Scientist with hands-on experience through internship and projects in Python, SQL, statistics, data preprocessing, exploratory data analysis, and machine learning. Skilled in classification and regression using Scikit-learn, feature engineering, model evaluation, and extracting insights from structured datasets. Familiar with data visualization, Power BI, Excel, ETL, and AWS cloud fundamentals. Developed machine learning and forecasting projects involving customer churn prediction and sales revenue analysis.

Skills

- **Programming:** Python, SQL
- **Python Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Joblib
- **Machine Learning:** Classification, Regression, Feature Engineering, Model Training, Model Evaluation, Cross-Validation, Hyperparameter Tuning
- **Data Science:** Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis, Data Validation
- **Statistics:** Descriptive Statistics, Probability, Hypothesis Testing, Correlation, Regression, A/B Testing
- **Visualization & BI:** Power BI, Excel, Power Query, DAX, Data Visualization, KPI Reporting
- **Cloud Fundamentals:** AWS EC2, S3, RDS, VPC, IAM, CloudWatch, IaaS, PaaS, SaaS
- **Tools:** Git, GitHub, MySQL, Jupyter Notebook, VS Code

Internship

Data Science Intern Jan 2026 – Jun 2026

Besant Technologies, Chennai

- Gained hands-on experience in data cleaning, preprocessing, and exploratory data analysis using Python, Pandas, and SQL.
- Analyzed structured datasets to identify trends, patterns, anomalies, and relationships between variables.
- Practiced statistical analysis and applied machine learning techniques to structured datasets.
- Built and evaluated classification and regression models using Scikit-learn as part of hands-on training.
- Created data visualizations and analytical reports using Python, Power BI, and Excel.
- Practiced feature engineering, data validation, model evaluation, and communicating analytical findings.

Projects

AI-Powered Customer Churn Prediction & Analytics [GitHub]

Python, Pandas, Scikit-learn, Machine Learning, Power BI

- Cleaned and preprocessed a customer dataset containing **2,000 records and 32 features**, including missing-value handling and feature preparation.
- Performed EDA to identify churn patterns across tenure, contract type, monthly charges, and customer behavior.
- Built a Logistic Regression classification model and evaluated performance using accuracy, precision, recall, F1-score, and ROC-AUC.
- Achieved **74.3% accuracy** and **0.794 ROC-AUC** on the test dataset.
- Identified key churn-related factors and generated customer retention insights from model results.

Sales Revenue Forecasting [GitHub]

Python, Pandas, Scikit-learn, Time Series, Feature Engineering

- Developed a revenue forecasting pipeline using a dataset containing **24,118 sales records and 12 features**.
- Cleaned and validated the dataset by removing **30 duplicate records** and handling **72 missing Marketing Spend values**.
- Created time-based, lag, and rolling-window features to capture historical sales patterns.
- Prepared historical revenue, units sold, pricing, discounts, promotions, holidays, and marketing spend features for forecasting.
- Used Joblib to save model and preprocessing components for reproducible predictions.

Education

Bachelor of Engineering – Electronics and Communication Engineering 2022 – 2026

St. Joseph College of Engineering, Chennai CGPA: 8.4/10.0

Certifications

Data Analytics Certification Jan 2026 – Jun 2026

Besant Technologies, Chennai

- Training in Python, SQL, Power BI, Excel, data analysis, data visualization, and dashboard development.
